**Space Missions to Comets**, 1979      Catching Stardust Natalie Starkey, 2018 Astonishing New Scientist Icy rocky sometimes dusty always mysterious comets and asteroids are among the Solar System's very oldest inhabitants formed within a swirling cloud of gas and dust in the area of space that eventually hosted the Sun and its planets Locked within each of these extra terrestrial objects is the 4.6 billion year wisdom of Solar System events and by studying them at close quarters using spacecraft we can coerce them into revealing their closely guarded secrets This offers us the chance to answer some fundamental questions about our planet and its inhabitants Exploring comets and asteroids also allows us to shape the story of Earth's future enabling us to protect our precious planet from the threat of a catastrophic impact from space and maybe to even recover valuable raw materials from them This cosmic bounty could be as useful in space as it is on Earth providing the necessary fuel and supplies for humans as they voyage into deep space to explore more distant locations within the Solar System Catching Stardust tells the story of these enigmatic celestial objects revealing how scientists are using them to help understand a crucial time in our history the birth of the Solar System and everything contained within it      **Vision and Voyages for Planetary Science in the Decade 2013-2022** National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Planetary Science Decadal Survey, 2012-01-30 In recent years planetary science has seen a tremendous growth in new knowledge Deposits of water ice exist at the Moon's poles Discoveries on the surface of Mars point to an early warm wet climate and perhaps conditions under which life could have emerged Liquid methane rain falls on Saturn's moon Titan creating rivers lakes and geologic landscapes with uncanny resemblances to Earth's **Vision and Voyages for Planetary Science in the Decade 2013-2022** surveys the current state of knowledge of the solar system and recommends a suite of planetary science flagship missions for the decade 2013-2022 that could provide a steady stream of important new discoveries about the solar system Research priorities defined in the report were selected through a rigorous review that included input from five expert panels NASA's highest priority large mission should be the Mars Astrobiology Explorer-Cacher (MAE-C) a mission to Mars that could help determine whether the planet ever supported life and could also help answer questions about its geologic and climatic history Other projects should include a mission to Jupiter's icy moon Europa and its subsurface ocean and the Uranus Orbiter and Probe mission to investigate that planet's interior structure atmosphere and composition For medium size missions **Vision and Voyages for Planetary Science in the Decade 2013-2022** recommends that NASA select two new missions to be included in its New Frontiers program which explores the solar system with frequent mid size spacecraft missions If NASA cannot stay within budget for any of these proposed flagship projects it should focus on smaller less expensive missions first **Vision and Voyages for Planetary Science in the Decade 2013-2022** suggests that the National Science Foundation expand its funding for existing laboratories and establish new facilities as needed It also recommends that the program enlist the participation of international partners This

report is a vital resource for government agencies supporting space science the planetary science community and the public

Yeomans,2016-11-08 An insider s look at the science of near Earth comets and asteroids Of all the natural disasters that could befall us only an Earth impact by a large comet or asteroid has the potential to end civilization in a single blow Yet these near Earth objects also offer tantalizing clues to our solar system s origins and someday could even serve as stepping stones for space exploration In this book Donald Yeomans introduces readers to the science of near Earth objects its history applications and ongoing quest to find near Earth objects before they find us In its course around the sun the Earth passes through a veritable shooting gallery of millions of nearby comets and asteroids One such asteroid is thought to have plunged into our planet sixty five million years ago triggering a global catastrophe that killed off the dinosaurs Yeomans provides an up to date and accessible guide for understanding the threats posed by near Earth objects and also explains how early collisions with them delivered the ingredients that made life on Earth possible He shows how later impacts spurred evolution allowing only the most adaptable species to thrive in fact we humans may owe our very existence to objects that struck our planet Yeomans takes readers behind the scenes of today s efforts to find track and study near Earth objects He shows how the same comets and asteroids most likely to collide with us could also be mined for precious natural resources like water and oxygen and used as watering holes and fueling stations for expeditions to Mars and the outermost reaches of our solar system **Meteor Showers and their Parent Comets** Peter Jenniskens,2006-09-14 Meteor Showers and their Parent Comets is a unique handbook for astronomers interested in observing meteor storms and outbursts Spectacular displays of shooting stars are created when the Earth s orbit crosses a meteoroid stream as each meteoroid causes a bright light when it enters our atmosphere at high speed Jenniskens an active

meteor storm chaser explains how meteoroid streams originate from the decay of meteoroids comets and asteroids and how they cause meteor showers on Earth He includes the findings of recent space missions to comets and asteroids the risk of meteor impacts on Earth and how meteor showers may have seeded the Earth with ingredients that made life possible All known meteor showers are identified accompanied by fascinating details on the most important showers and their parent comets The book predicts when exceptional meteor showers will occur over the next fifty years making it a valuable resource for both amateur and professional astronomers

**Comets in the 21st Century** Daniel C Boice, Thomas Hockey, 2019-04-25 Have you ever seen a comet It is a marvelous experience one that all humans can share that spawns a deep yearning to understand the spectacle Have you ever wondered what comets are and why astronomers spend so much time studying them Now a comet expert and an astronomical historian have come together to produce the unique book that you now hold in your hands Using their several decades of teaching experience the authors have concisely presented the information you need to comprehend these majestic apparitions that grace our night skies No mathematical proficiency is needed in fact this book doesn't contain a single equation Comets are cosmic Rosetta stones bridging our current knowledge by digging back to the earliest days of our Solar Systems How did life arise on Earth Did comets play a significant role in bringing water and the necessary organic matter to our early Earth How about the dinosaurs Were they driven to extinction by a cometary impact 66 million years ago Comets may be both the enablers and destroyers of life on Earth as we know it These are some of the tantalizing questions discussed here If you so desire steps are given to join the ranks of amateur comet hunters Astronomy is one of the last sciences where amateurs play a significant role Your reward for discovery A comet officially bearing your name in the history books The next Great Comet is on its way we just do not know when it will arrive Armed with this book you will be ready to enjoy this unforgettable event

*Mitigation of Hazardous Comets and Asteroids* M. J. S. Belton, 2004-09-06 It is known that large asteroids and comets can collide with the Earth with severe consequences Although the chances of a collision in a person's lifetime are small collisions are a random process and could occur at any time This book collects the latest thoughts and ideas of scientists concerned with mitigating the threat of hazardous asteroids and comets It reviews current knowledge of the population of potential colliders including their numbers locations orbits and how warning times might be improved The structural properties and composition of their interiors and surfaces are reviewed and their orbital response to the application of pulses of energy is discussed Difficulties of operating in space near or on the surface of very low mass objects are examined The book concludes with a discussion of the problems faced in communicating the nature of the impact hazard to the public

[From Jars to the Stars](#) Todd Neff, 2016-01-01 How did a company best known for its glass jars hit a comet 83

million miles away The answer involves technical expertise heroic dedication an industrial giant s push to modernize Hitler s V 2 rocket speakers destined for a Hall Oates summer concert tour and the search for life s origins In *From Jars to the Stars How Ball Came to Build a Comet Hunting Machine* award winning science journalist Todd Neff presents an inside look at the backgrounds and motivations of the men and women who actually create the spacecraft on which the American space program rides A timeless story of science engineering politics and business strategy intertwining to bring success in the brutal business of space *From Jars to the Stars* is a lively account of one of mankind s great modern achievements It is a story about people foremost those on the Deep Impact mission which smashed a spacecraft into the comet Tempel 1 *From Jars to the Stars* explores the improbable beginnings of Ball Aerospace Technologies Corp which built the comet hunter and the evolution of the American space agency that funded it The book begins with the story of a group of University of Colorado students who built a sun seeker for the noses of sounding rockets studying the home star The pathbreaking device sparked the creation and development of both Ball Aerospace and the University of Colorado s formidable Laboratory for Atmospheric and Space Physics *From Jars to the Stars* describes how Ed Ball president of the Ball Brothers Company of Muncie Indiana ended up owning a space business in Boulder Colorado through a combination of strategic intent and serendipity Neff explores the personalities and the technologies behind Ball s pioneering spacecraft the Orbiting Solar Observatory launched in 1962 The Ball orbiter prepares the ground for Deep Impact showing readers how much and how little changed across four decades of American space exploration Neff goes on to show how Ball Aerospace evolved into an organization capable of building seven Hubble Space Telescope instruments as well as the comet hunter at the center of the story The author describes the development of the American space enterprise as it went from emphasizing big budget gigabuck missions to faster better cheaper spacecraft of the sort Ball specialized in Neff pays special mind to NASA s Jet Propulsion Laboratory the world leader in interplanetary space exploration and Ball s partner on Deep Impact It was often a rocky marriage Throughout Neff makes clear that robotic space missions are indeed manned the people just happen to stay on the ground

*The Wormwood Prophecy* Thomas Horn,2019 Is the star from Revelation 8 already headed toward Earth What s more do government officials already know the answer to that question Traditional scholarly interpretation claims that the Wormwood star will be an asteroid Others postulate that it will poison one third of all of Earth s waters and we may not even notice it Others believe the star could hit without returning like an angel of God appearing in the sky with fire and light bringing judgement in an instant Do prophecies from ancient cultures and religions across the globe point to this catastrophe Have scientists and politicians taken extreme measures to keep this under the public radar Is this why President Donald Trump sanctioned a colossal increase to planetary defense Follow Thomas Horn as he blazes through these questions and many others posing answers that few in the church today are willing to provide Back cover [Physical Studies of Minor Planets](#) Tom Gehrels,1971 Some papers and discussions included in this book even though they were not presented at the meeting In

some respects therefore the book is independent of the colloquium Several papers had been invited long beforehand with the request to publish them as review papers The lack of a modern textbook on minor planets is keenly felt and the proceedings of this meeting with these additions should provide a good reference book Page viii Comets Donald K.

Yeomans, 1991-02-08 The diminutive size of cometary bodies is in no way proportional to their scientific importance Theorists suggest that comets played a major role in the development of the Earth and subsequent collisions of comets may have wiped out various life forms allowing only the most adaptable to develop further In short the study of comets is important from a historical perspective scientifically compelling and at the same time entertaining In this authoritative book the development of cometary ideas is traced from antiquity through the actual fly by of Halley by international spacecraft in 1986 The focus is on the cometary theories that were evident in each era Included are many colorful anecdotes and information about culture and important personalities throughout history Also contains an exhaustive catalog of all comet apparitions through the year 1700
