Bainton, Emilia E. Skrzypek, 2021-08-03 Standing on the broken ground of resource extraction settings the state is sometimes like a chimera its appearance and intentions are misleading and for some actors it is unknowable and incomprehensible It may be easily mistaken for someone or something else like a mining company for example With rich ethnographic material this volume tackles critical questions about the nature of contemporary states studied from the perspective of resource extraction projects in Papua New Guinea Australia and beyond It brings together a sustained focus on the unstable and often dialectical relationship between the presence and the absence of the state in the context of resource extraction Across the chapters contributors discuss cases of proposed mining ventures existing large scale mining operations and the extraction of natural gas Together they illustrate how the concept of absent presence can be brought to life and how it can enhance our understanding of the state as well as relations and processes forming in extractive contexts thus providing a novel contribution to the anthropology of the state and the anthropology of extraction The Absent Presence fills a major gap in our knowledge about the relationship between states and companies at a time when resource extraction seems to be more contested than ever Bainton and Skrzypek have curated an incredibly impressive volume that should be read by all those interested in exploring corporate and state power and the ever present impacts of extraction A highly recommended read Professor Deanna Kemp Director of the Centre for Social Responsibility in Mining The University of Queensland Countless books have been written on the sovereign state and how it imposes a particular kind of order on economic and social interactions What is original and compelling about this collection is the portrait of how two very different states converge when it comes to extractive ventures From the presumption of exclusive sovereignty over mineral resources to the bargains that are struck with major often global corporations and the relative indifference to environmental impacts there is a remarkable consistency in the patterns that are referred to as state effects These effects are brought from the background to the foreground in this book through the blending of creative and critical thinking with detailed empirical research Tim Dunne Pro Vice Chancellor and Professor of International Relations The University of Queensland This brilliant and intriguing title provides a timely contribution to understanding the actual functions and strategies of state and state like institutions in resource arenas The dialectics of

presence absence and its refractions at different levels and scales of government allow the authors to go beyond stereotypes about the strong weak failed or corrupt state highlighting more commonalities than expected between Papua New Guinea and Australia and even New Caledonia Dr Pierre Yves Le Meur Anthropologist Senior Researcher French National Research Institute for Sustainable Development Joint Research Unit SENS Knowledge Environment Society *Fisher Investments on Materials* Fisher Investments, Andrew Teufel, Brad Pyles, 2009-02-03 The second installment of the Fisher Investments On series is a comprehensive guide to the Materials sector Fisher Investments on Materials can benefit both new and seasoned investors covering everything from Materials sector basics to specific industry insights to practical investing tactics including common pitfalls to avoid The book will begin with a discussion of Fisher Investments investing philosophy as it applies to the Materials sector Then readers will be lead through a discussion of sector basics what drives the industries and develop a framework for individual security analysis Finally the book will look at industry fundamentals and discuss what investors can do to protect themselves in a down market For more information visit www.materials.fisherinvestments.com

Brett Kebble Barry Sergeant,2012-03-23

In September 2005 corporate South Africa was rocked by the violent murder of mining maverick Brett Kebble In life he was known as a billionaire patron of the arts compassionate philanthropist champion of black economic empowerment urbane raconteur and generous host But within six months of his death Kebble was exposed as the architect of one of the biggest and most convoluted frauds seen by any stock exchange in the world a flawed genius who lied and cheated and stole so cunningly that even astute auditors were fooled By the time he died Kebble was both broke and jobless His legacy was a maze of convoluted transactions that would take forensic investigators months perhaps years to untangle The trail would lead from one of the African continent s oldest and most venerable mining houses to more than 100 shell companies from the diamond fields of Angola to the new black elite in democratic South Africa s upmarket suburbs But in the wake of Kebble s death far darker secrets than his unorthodox and downright criminal transactions would also come to light Many of them are revealed for the first time in this hard hitting A B C of Brett Kebble s brilliant but terminally crooked business career
